ATTACHMENT

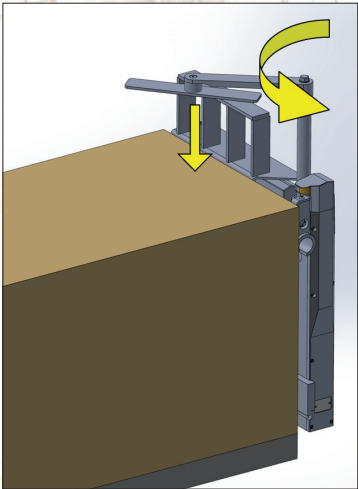

E-clamp is a unique product

The E-clamp is powered with electricity (12-48V) and has its own built-in PLC system that is programmable to meet customer demands, providing safer, faster and more stable goods handling.

Benefits with E-clamp

- Safer, faster and more stable material handling
- Rapid in all movements and good visibility for driver
- PLC programmable with a compact and unique solution
- Pressure plate does not press on the edges, minimizing damage to the goods
- Truck driver can monitor the E-clamp on the display in the cabin
- Easy to operate
- Only one tap on "Grab" or "Release" button

E-clamp suits all your forklift trucks

Options for E-clamp

User interface	Customize arm	Programmable	Electric power
Display	Length	Movements	Standard 48 Volt
Buttons	Height	Speed	Converter 12-24 Volt
Wireless*	Type of material handling	Pressure
